## PROFILE

I'm **Devanand Utkarsh**, a passionate software developer currently pursuing my **MCA from Chandigarh University**. With **2 years of experience in self-building web projects**, I've developed a solid foundation in both **frontend and backend development**, honing my skills in technologies like **JavaScript, React, Next.js, Node.js, SQL, and MongoDB**. My journey has been enriched through various projects and an **internship with Octanet**, where I gained practical insights and industry exposure.

## SKILLS

node.js, express.js, JavaScript,  
react.js, next.js, SQL, MongoDB,  
Printing, Creativity,  
Real-world problem solving  
Team works  
Programming languages

## EXPERIENCE

Website development frontend and backend

### 2019- 20..

I have accumulated 2 years of hands-on experience in independently building web applications, both on the frontend and the backend. My journey started from the basics, and through consistent learning and practice, I've become proficient in crafting seamless and dynamic user interfaces, as well as robust server-side architectures. This experience has honed my skills in various technologies, allowing me to deliver well-rounded, full-stack solutions.

## EDUCATION

Chandigarh University

### 2024-2026

Master Computer application  
(MCA)

Gaya college, Gaya

### 2019-2022

Bachelor Computer Application  
(BCA)

### Weather App:

A real-time weather application built with **React** that's fetches and displays weather data.

### T-shirt Order Website:

An e-commerce platform for customizing and ordering T-shirts, developed using **React** and **JavaScript**.

### Room Rental Management System:

Developed a dynamic **Next.js** application where homeowners (admins) can register, manage, and perform CRUD operations on room listings.
